Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1,13,16 and 21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,233,026. Although the conflicting claims are not identical, they are not patentably distinct from each other because all claims are directed toward a monitor case with snap fittings. The patent claims all the various snap fittings, snap portions, snap pins, shoulder portions, engaging pins, detents, holes and surfaces. The difference being that the patent further claims a lower shield that is absent from the instant application and does not claim the rear casing. However, the use of a rear casing would be obvious as the pins of the front casing would, of necessity, engage with something and this would be a rear casing.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1,13,16 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beak.

Beak discloses a monitor (fig 1) with a front casing (10), which encloses a cathode ray tube (20), a rear casing (40), the front casing having a snap portion and (11 and 11') at the bottom of the front case (fig 1) that are received in a slot in the rear case (in 42 and 42' respectively). Beak further discloses pins (not numbered but best seen in fig 1 around the periphery of the rear case) that would be accepted by openings in the front case. Beak further discloses a snap portion (41,42) The slot has a receiving section with snap pin (below feature 12 as best seen in fig 3) that engages the engaging pin to hold it in place. Beak does not disclose the snap portion at top of the casing, however, shifting of parts is a matter of obvious design choice that is well settle in case law (In re Japikse 86 USPQ 70 (CCPA 1950)) which states that shifting the location of parts would have been within the general skill of a worker in the art, it would have been well within the purview and obvious to shift the location of the portions as claimed. The method of claim 21 would produce this configuration and is therefore inherently disclosed.

Allowable Subject Matter

Claims 2-12,14,15,17-20 and 22-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments have been considered but are not persuasive. As to the Double Patenting rejection, as is mentioned in previous actions, while the claims are not identical, the modifications would be obvious. As to the rejection under art, the examiner has reevaluated the rejection in light of the applicant's arguments, as indeed the examiner did after the arguments in the Appeal Brief filed 7/22/02 (paper #17). Which reevaluation confirmed to the examiner that the rejection is proper. As to the arguments, the objections raised would appear to the examiner to be answered in the body of the rejection as enclosed in paper # 19 and herein.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
